High quality - High stacker

The Chairik series, designed by Erik Magnussen in 1996, is a versatile collection of chairs known for its exceptional stacking capabilities and clean, contemporary look.

Uncomplicated, simple, and convenient – the Chairik chair embodies timeless functionality. Its minimalist design is especially striking when the chairs are stacked.

At its best, the chair can stack up to 45 chairs and hold approximately 1,000 chairs in just 14 m².

CHAIRIK IN RECYCLED PLASTIC

Relaunched in 8 Montana Colours in 2022

CHAIRIK

Chairik is available in both melamine and recycled plastic

The designer

In 1960, Erik Magnussen graduated as a ceramicist and began working as an industrial designer for the highly esteemed Bing & Grøndahl. Since the late 1970s, Magnussen has been synonymous with the Stelton thermos.

A key theme in Erik Magnussen's work is simplicity – nothing superfluous.

He had a pragmatic view of design, believing it should be functional and durable above all else.

Erik Magnussen's designs are exhibited in museums worldwide, and he has received numerous acknowledgments and awards for his work.

The chair

The initial idea was to create an ergonomic and minimalist chair that would last for years while taking up the least amount of space.

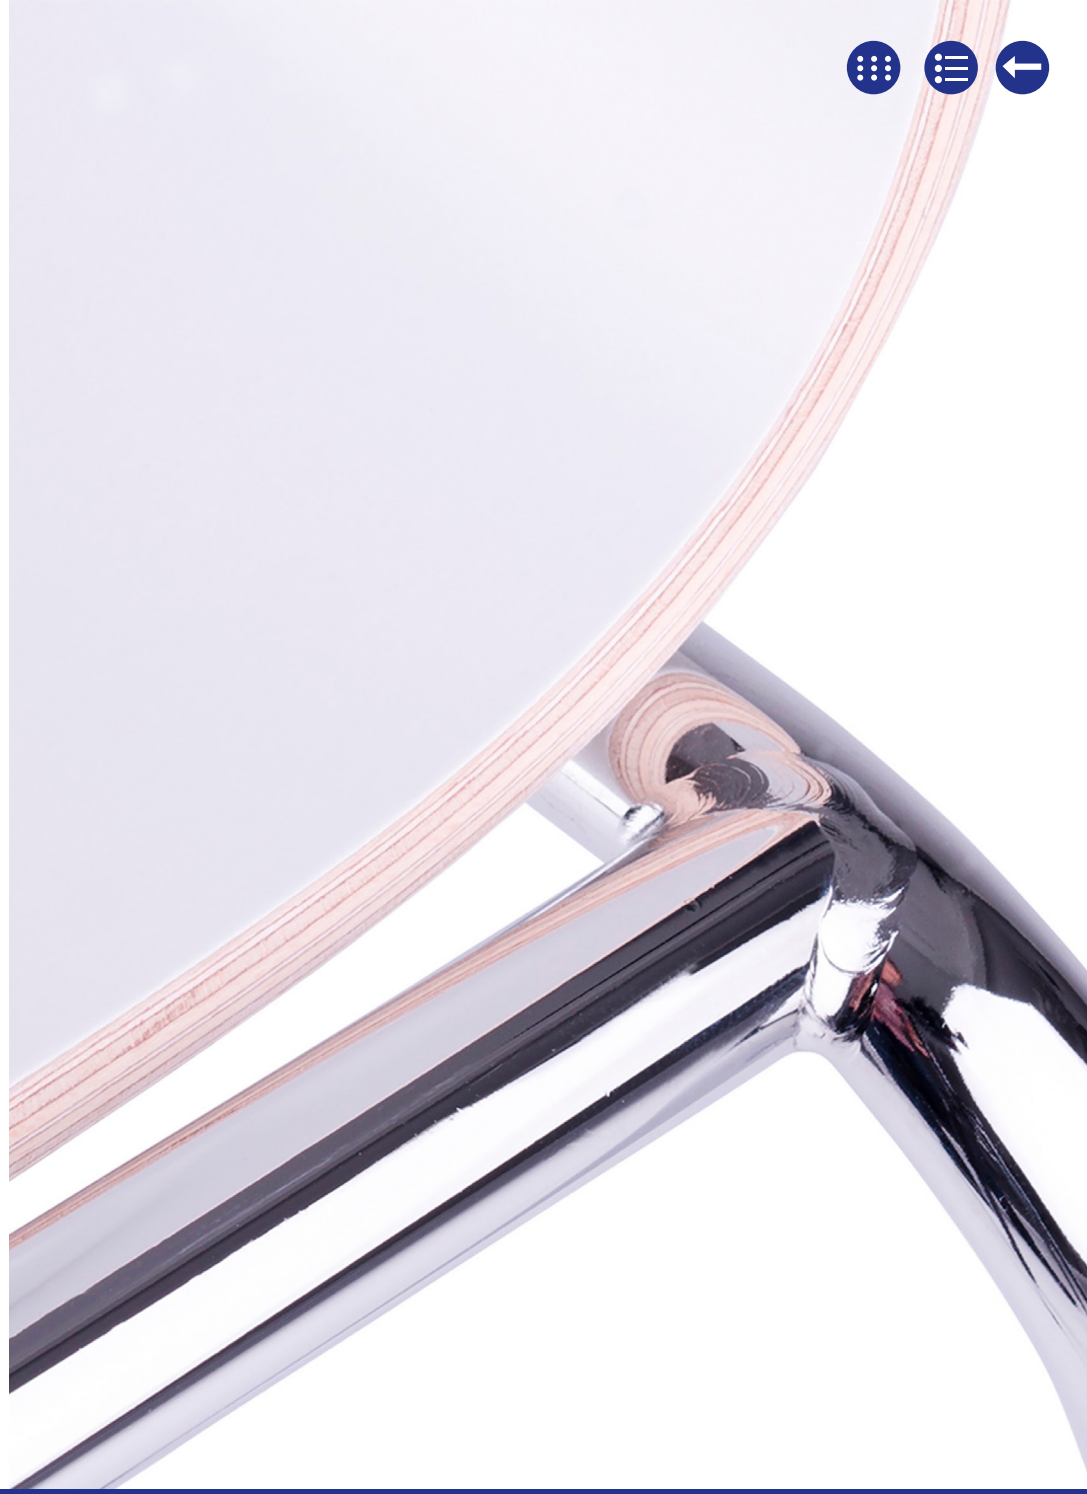
During a visit to a manufacturer in Sweden, Magnussen became fascinated by a serving tray during his lunch break. The melamine-treated suspended veneer material inspired the creation of the iconic Chairik.

Magnussen chose melamine veneer for its exceptional quality and strength. The 21 layers of veneer and thin glue paper proved to be stronger than regular lacquered veneer and require minimal maintenance. Today, Montana still produces the Chairik in melamine in Sweden.

The Chairik chair is an archetypal example of simplicity. With its two-dimensional, easily manufactured shell, Erik Magnussen achieved both high comfort and striking design.

The shell is inspired by the human body, with its two-dimensional shape imitating the flexibility of the three-dimensional form. This design provides comfort for the spine and accommodates the arches of the thighs.

The one-piece shell is centered on the frame, which protects the shell and reduces the chair's total height – an essential feature when stacking is key.



CHAIRIK

With extraordinary stacking performance, up to 45 schairs on each trolley, Chairik is a real space saver in storage.

Sizes, functions and materials

Initially, the series featured a single four-legged chair, but over time it evolved to include 18 different models.

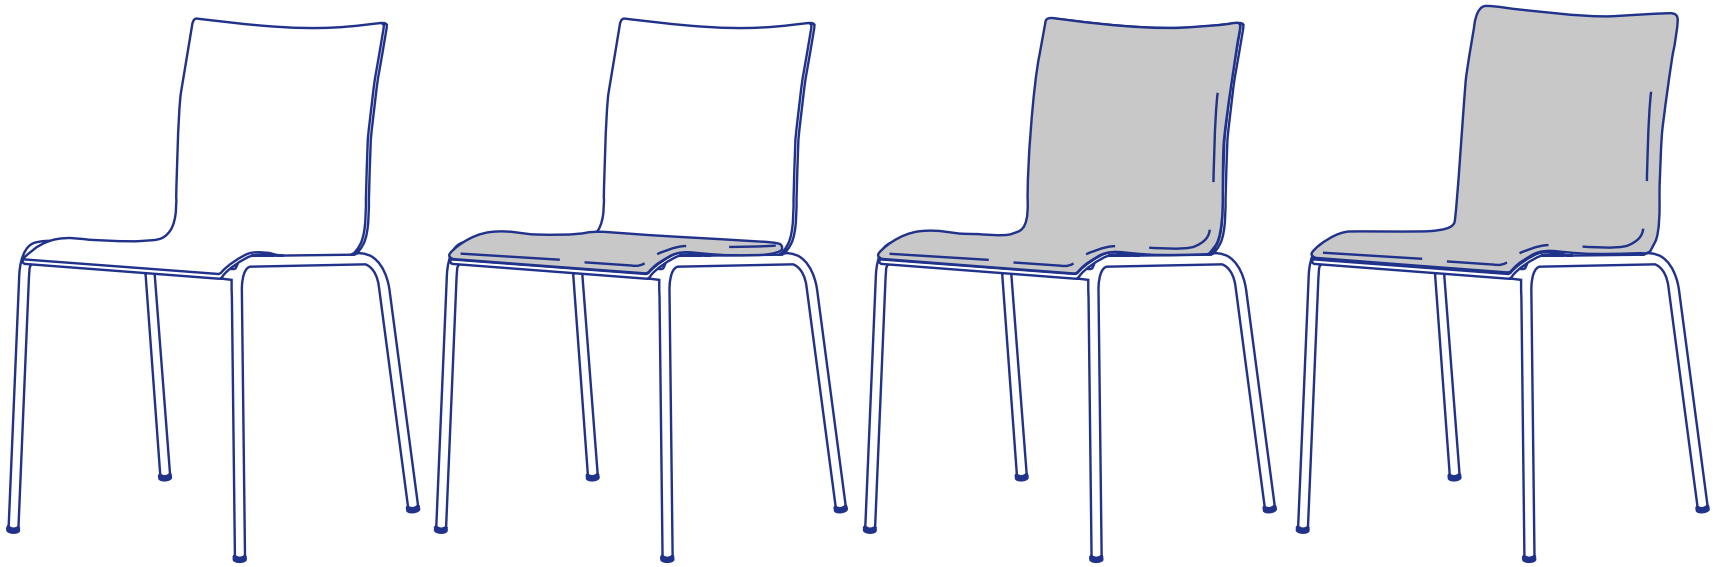
Chairik models are designed for both office and workspace environments, as well as larger venues where flexible seating options are a priority.

CHAIRIK

Chairik is available in both melamine (left) and plastic (recycled PP plastic right)

CHAIRIK IN TWO MEASUREMENTS - REGULAR AND XL

The Chairik models on four legs and on sled are developed in both a simple and space conscious size (left) and in a more comfortable XL version (right) where the width of the shell as well as the height of the back has been increased.



Shell | Seat upholstery | Inner side upholstery | Full upholstery

CHAIRIK

Chairik is available with clean shell, seat upholstery, inner side upholstery and full upholstery

CHAIRIK ON-/ OFF SEAT UPHOLSTERY (PRE-FITTING)

With the pre-fitting of magnets underneath the shell, it is possible to change the personality of the Chairik with a removable seat. Available for all models.

CH129XL

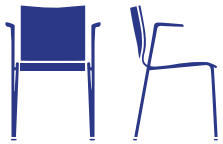
CH129XL is a four-leg chair with an closed armrest in XL size.
The ergonomically rounded shell is available in six melamine colors, melamine oak veneer, or two plastic color options.

The Ø18 mm tubular frame is made of polished chrome, with polished aluminum armrests. The chair can be customized with various upholstery options, coupling brackets, or an attached table, and comes with plastic gliders on the legs.

- Dimensions: H 79 x SH 46 x D 58 x W 57 cm
- Weight: M: 6.3 kg P: 7 kg

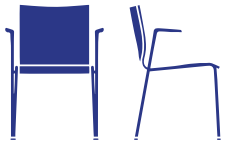


CH113

CH113 is a four-leg chair with an open armrest. The shell features an ergonomically rounded design and is available in six melamine colors, melamine oak veneer, or eight colors of recycled polypropylene plastic.

The Ø16 mm tubular frame is made of polished chrome, with armrests in polished aluminum. The chair can be customized with various upholstery options, coupling brackets, or an attached table. The chair is delivered with plastic gliders on legs.

- Dimensions: H 75 x SH 45 x D 54 x W 52 cm
- Weight: M: 4.9 kg P: 5.2 kg



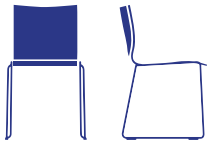
CH123XL

CH123XL is a four-leg chair with an open armrest in XL size. The shell features an ergonomically rounded design and is available in six melamine colors, melamine oak veneer, or recycled plastic in black and white.

The Ø18 mm tubular frame is made of polished chrome, with armrests in polished aluminum.

The chair can be customized with various upholstery options, coupling brackets, or an attached table, and is delivered with plastic leg gliders.

- Dimensions: H 79 x SH 46 x D 58 x W 57 cm
- Weight: M: 5.8 kg P: 6.5 kg



CH107

CH107 features a sled frame and is the highest stackable chair in the Chairik family. The shell is available in six melamine colors, melamine oak veneer, or recycled polypropylene plastic in eight colors. The Ø11 mm wire sled frame comes in either powder-coated steel or polished chrome.

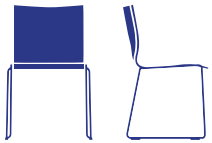
The chair can be customised with various upholstery options, coupling brackets, or an attached table.

The sled frame is delivered with plastic gliders, and felt gliders are also available for purchase.

- Dimensions: H 77 x SH 46 x D 53 x W 47 cm
- Weight: M: 5.2 kg P: 5.5 kg
- Stacking ability on trolley: 45 pcs.

CHAIRIK

Chairik 107 is certified with the EU Ecolabel



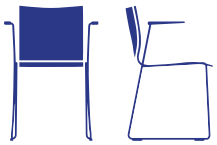
CH127XL

CH127XL is a sled frame chair in an XL size.

The shell features an ergonomically rounded design and is available in six melamine colors, melamine oak veneer, or plastic in two colors. The Ø11 mm wire sled frame comes in either powder-coated steel or polished chrome.

The chair can be customised with various upholstery options, coupling brackets, or an attached table. The sled frame is delivered with plastic gliders.

- Dimensions: H 80 x SH 46 x D 57 x W 52 cm
- Weight: M: 5.8 kg P: 6.5 kg

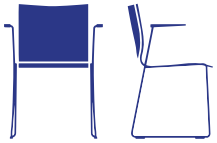


CH111

CH111 is a sled frame chair featuring an open armrest. The shell is an ergonomically rounded seat available in six melamine colors, melamine oak veneer, or eight colors of recycled plastic.

The Ø11 mm wire sled frame is offered in polished chrome, complemented by polished aluminum armrests.
The chair can be customised with various upholstery options, coupling brackets, or an attached table. The sled frame is delivered with plastic gliders.

- Dimensions: H 77 x SH 46 x D 53 x W 52 cm
- Weight: M: 5.9 kg P: 6.2 kg

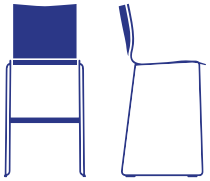


CH128XL

CH128XL is a sled frame shell chair with open armrests in an XL size.
The shell features an ergonomically rounded design and is available in six melamine colors, melamine oak veneer, or plastic in two colors.

The Ø11 mm wire sled frame comes in polished chrome, complemented by polished aluminum armrests.
The chair can be customised with various upholstery options, coupling brackets, or an attached table. The sled frame is delivered with plastic gliders.

- Dimensions: H 80 x SH 46 x D 57 x W 57 cm
- Weight: M: 6.6 kg P: 7.4 kg



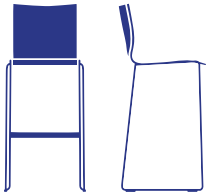
CH119 COUNTER

CH119 is a sled frame shell chair designed for counter or kitchen height. The shell features an ergonomically rounded design and is available in six melamine colors, melamine oak veneer, or recycled plastic in eight colors.

The Ø11 mm wire sled frame is offered in polished chrome or powder-coated steel. The chair can be customised with various upholstery options, coupling brackets, or an attached table.

The sled frame is delivered with plastic gliders.

- Dimensions: H 98 x SH 68 x D 52 x W 47 cm
- Weight: M: 6.3 kg P: 6.6 kg



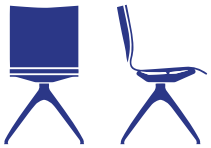
CH117 BAR

CH117 is a sled frame shell chair designed for bar height. The shell features an ergonomically rounded seat and is available in six melamine colors, melamine oak veneer, or eight colors of recycled polypropylene plastic.

The Ø11 mm wire sled frame is offered in polished chrome or powder-coated steel. The chair can be customised with various upholstery options, coupling brackets, or an attached table.

The sled frame is delivered with plastic gliders.

- Dimensions: H 107 x SH 76 x D 53 x W 47 cm
- Weight: M: 6.7 kg P: 7 kg



CH136XL

CH136XL features the classic Chairik shell mounted on a four-star swivel base.
The shell is available in six melamine colours, melamine oak veneer, or recycled plastic in two colours. The four-star base is made of aluminium.
